Climate Change Saskatchewan

**CHANGE FOR
A BETTER
SASKATCHEWAN...**

Here are five things you can do to help reduce the rate of climate change . . .

1. Instead of turning up the thermostat, put on a sweater and socks or slippers.
2. Ride your bike, walk, or take the bus when going short distances.
3. Only run the washing machine on a full load...you'll save energy, not to mention water and detergent!
4. Reuse grocery bags when you go to the store. Backpacks or cloth bags are a reusable alternative, too.
5. Try to remember to turn off the lights, television, and radio when you leave the room.
